

**MRIGlobal provides secure GMP and nonGMP storage and experienced testing of your drug substance and drug products per your specified procedures and timetables.**

We can use your procedures or compendial methods to support your stability needs. Our staff can also design studies specific to your project needs, and our experienced Method Development and Validation team is available for any additional services you may require.

### OUR CAPABILITIES

Supporting preclinical through approved products, including sample retains.

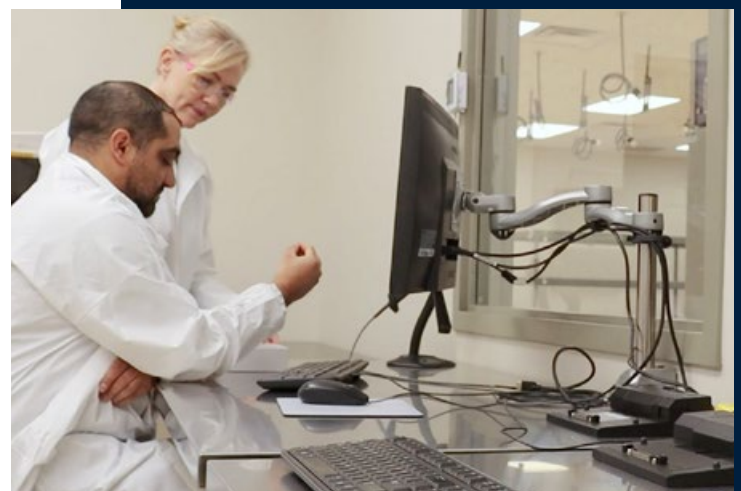

- ICH Guideline Stability Conditions Available
- Programmable Chambers
- Back up chambers and parts on-site
- Temperature Mapped Suite
- Dedicated Generator
- Alarm System

### STABILITY CHAMBER CONDITIONS

- -80°C
- -20°C
- 2°- 8°C
- Controlled Room Temperature
- 25°C/60% RH
- 30°C/65% RH
- 40°C/75% RH
- Custom Conditions (Including RoW)

### OUR EQUIPMENT

- 3600 Sq. Ft. of Stability Storage Space
- Fully Validated
- Fully Controlled Monitoring and Alert System
- Emergency Power Back Up System
- Schedule III-V Controlled Substance Handling

### CUSTOMIZED SOLUTIONS FOR PRODUCT DEVELOPMENT

MRIGlobal helps pharmaceutical clients accelerate their timeline and reduce the risks of getting a product to market by providing customized solutions to their product program. We bring a long history of diverse technical and regulatory expertise as well as a legacy of integrity and collaboration to make certain each client's objectives are achieved - on time and on budget.

#### OUR FULL SERVICES INCLUDE:

- Analytical Method Development and Phase Appropriate Validation for API DS & DP, Intermediates, and Impurities

- Bioanalytical Method Development and Validation, and Sample Analysis for Analyte Quantitation in Multiple Species and Matrices

- GLP and cGMP Stability and Storage of Drug Substances and Drug Products

- Custom Synthesis, Preclinical Batch Preparation and GLP Characterization, and Metabolite/Impurity Synthesis
