

PREPARE FOR AUDITS WITH MRIGLOBAL

LABORATORY STAND-UP AND OPERATIONS

MRIGlobal partners with organizations around the world to support stand-up and operations of high containment, research, and diagnostic laboratories.

BIORISK MANAGEMENT PROGRAM SUPPORT

MRIGlobal's team of experts works collaboratively with clients to grow their biosafety programs into a right-size solution to address their evolving scientific needs.

BIORISK MANAGEMENT PROGRAM EXTERNAL ASSESSMENT

MRIGlobal annually evaluates the lab site, biosafety program, and audit readiness to identify opportunities for continuous growth, improvement, and sharing of organizational expertise.

CAPABILITIES

NEW BIOSAFETY OFFICER ASSISTANCE SITE ASSESSMENT

Through a site audit, the MRIGlobal team prepares you for a third-party inspection, ensuring that operations are ready to meet regulatory guidelines and requirements.

BIOSAFETY PROGRAM REVIEW AND RECOMMENDATIONS

We perform a comprehensive and systematic evaluation of your policies, procedures, and practices that ensure the safe handling and containment of biological materials.

AUDIT PREPARATION AND INTERNAL AUDITOR TRAINING

Our team provides training on how to conduct your own internal audits and to effectively host a third-party audit, such as CDC, USDA, or select agent program.

EXERCISE AND DRILL DESIGN AND EXECUTION

Our team will design and execute exercises that identify opportunities for continuous improvement, build laboratory staff confidence, reinforce lines of communication across the organization, and enable strong response capabilities

CASE STUDY

CHALLENGE

A commercial client with multiple laboratory sites called on MRI Global to perform a site inspection and external assessment of their biosafety program.

SOLUTION

Our biosafety team conducted a physical assessment, performed a physical biosafety and documentation review, and provided recommendations for growth opportunities.

RESULT

This effort helped build a resilient biosafety program that maintained a high standard of performance through several changes in leadership without compromising quality or effectiveness.

OUR TEAM

With more than 80 years of collective experience, our team of certified professionals in biorisk management, quality management, and program management works with clients to build, strengthen, and expand their biosafety programs. Our in-house expertise includes biotechnology; microbiology; molecular, serological, and clinical diagnostics; biosafety and biosecurity; core laboratory operations; quality management; engineering; and field work. We are also experts in preparing clients to meet U.S. and WHO biosafety standards, as well as guidelines for animal and biosafety level-1, -2, -3, and -4 facilities.

CREDENTIALS

Our dedicated staff has credentials in fields including biosafety (RBP, CBSP), business and program management (PMP), public health (CPH) and quality assurance (ASQ CQA, ASQ CMQ/OE), as well as graduate degrees in microbiology and related fields. Our team is also heavily supported by subject matter experts in a variety of biological science, physical science, engineering, and safety-related disciplines.
